 Subject: Verification Form and Nutranl Results for DuSable Park

Hi Gene:

I have attached a PDF copy of the Nutranl results and verification from for the samples you collected earlier today at DuSable Park. The results indicate the area was remediated to a concentration of about 3.5 pCi/g total radium versus the USEPA cleanup level of 7.1 pCi/g. Therefore, please fax the signed verification form to my attention at 847-279-2510. I also would appreciate if you could reply to this email acknowledging that you have signed-off on the verification form (released the area). Thank you again for your assistance.

Please feel free to contact me if there are any questions.

Sincerely,

*Steve Kornder*
